### **DETAILED ACTION**

It is noted on page 12 of Applicant remarks received on 12/16/2005 it states "Applicants respectfully request that the rejection of independent claim 1 and its dependent claims 81-83, 86-92, and 94-99 be withdrawn." It is pointed out that any listing of claims prior has only been from 1-5, and currently the claims only go up to 14. Examiner believes that this was made in error, however if this was not made in error Applicant should address this issue.

#### ***Allowable Subject Matter***

1. Claims 1 & 4-14 are in condition for allowance.
2. The following is an examiner's statement of reasons for allowance: the subject matter of the independent claims could either not be found or was not suggested in the prior art of record. The subject matter not found was an arrangement where through travel of a dose dial sleeve, a reset sleeve is carried towards the second end of the device which in turn automatically resets the dose display to zero, specifically as claimed.
3. The closest prior art of record is Steinfeldt-Jensen et al (6,004,297). Steinfeldt-Jensen does not disclose a dose dial and drive mechanism characterized in that when said dose dial sleeve travels towards the second end of the housing the reset sleeve is carried with the dose dial sleeve towards the second end of the housing thereby resetting the dose display to a zero position, as claimed. In fact, Steinfeldt-Jensen discloses that any movement or travel of the dose scale drum towards the second end actually results in an increase in the displayed dose.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
